**DETAILED ACTION**

***Response to Amendment***

1. The amendments to the specification of the disclosure in the submission filed 11/26/08 are acknowledged and accepted. In view of these amendments, the objections to the specification in Section 5 of the Office Action dated 7/31/08 are respectfully withdrawn.
2. The amendments to Claims 1, 3 in the submission filed 11/26/08 are acknowledged and accepted.

***Response to Arguments***

3. The Applicants' arguments, see in particular Pages 6-7 of the submission, filed 11/26/08, with respect to the rejections in Section 10 of the Office Action dated 7/31/08, have been fully considered and are persuasive. The rejections in Section 10 of the Office Action dated 7/31/08 have been withdrawn.
4. Claims 1-6 are now rejected as follows.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:  

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Each of Claims 1 and 3 recites the limitations “...*a holographic recording material* sandwiched from both sides by two substrates having an uneven shape including a step in thickness; and *a recording layer* having a white-light reconstruction holographic recording layer region and a Fourier holographic recording layer region...” (Emphasis added). Thus, as amended, each of Claims 1 and 3 has a sandwiched holographic recording material and a recording layer. However, as disclosed in Figure 1 of Applicants' figures, there appears to be only a single recording layer (See 12 in Figure 1) that is sandwiched between two substrates (See 14A, 14B in Figure 1). There does not appear to be a holographic recording material layer that is separate from the single recording layer. It appears that the *holographic record material is to comprise the recording layer* having the white-light reconstruction holographic recording layer region and the Fourier holographic recording layer region. For purposes of examination, the recited limitations in Claims 1 and 3 have been interpreted as such. Claims 2, 4-6 are dependent on Claims 1 and 3, and hence inherit the deficiencies of Claims 1 and 3.

***Allowable Subject Matter***

7. Claims 9-10 are allowed.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
